

HENDO INDUSTRIES

NEW LONG STROKE BALANCER

Advantages

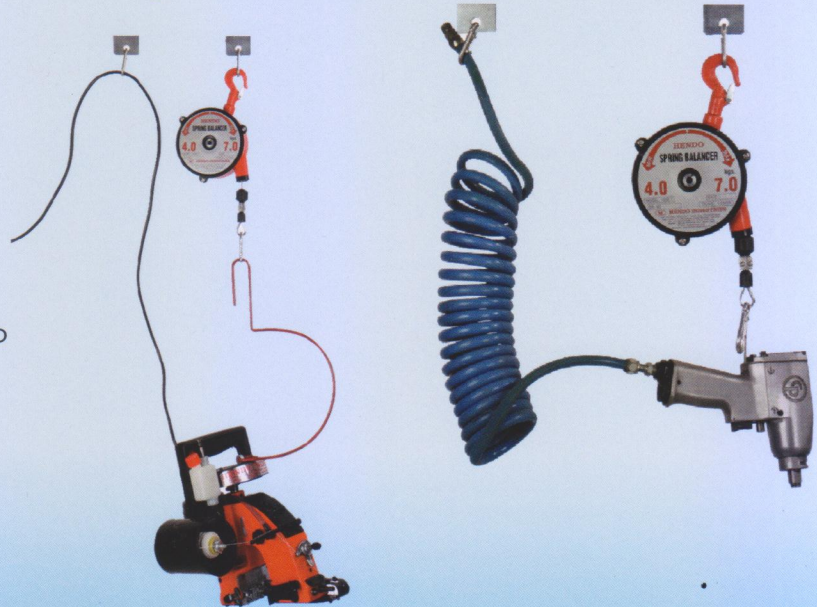

- Reduces operator fatigue
- No need of electric or pneumatic power
- Increases productivity dramatically
- Increases safety while working with heavy loads
- Effective use of space
- Can be used vertically up & down
- Travel Length 2.3 meters

Merits

- Made from high grade aluminium in pressure die casting
- Provides indicator for reading weight
- Top Hook & Bottom hook drop forged
- Steel core wire rope for long life
- Cartridge Type spring housed in casing made from EDD quality steel duly made from deep drawing dies
- Provision of worm & worm gear for easy tensioning which can be done from floor level
- Provision of thrust bearing on top hook to facilitate smooth rotation of spring balancer while in operation

Applications

- Body shop of Cars, Jeeps, Trucks, Vans
- Assembly of Engines, Refrigerators, Type-writers, Computers, Washing Machines, Television, VCR, Music System
- Portable Bag closing machines
- Pneumatic Tools Sanders, Grinders
